

Abdulkarim Zahidi

Software Developer

I am a full-stack software developer with over 2 years of work experience in programming and creating interactive web applications. I am proficient in a variety of programming languages, including Java and JavaScript, and have worked extensively with frameworks such as Angular, React, and Spring Boot. I am currently looking for job opportunities in the field of software development to contribute my skills and experience to innovative projects.

Skills

- Java Programming
- JavaScript
- Spring Boot
- Angular
- React
- Git control version
- HTML & CSS

Experience

05/2023 - Current

Enel | Rome (Italy)

Software Developer

During the 6-month internship, I had the opportunity to actively participate in the development of microservices and platform solutions at the Enel company which is used by different departments of the company. I worked as a full-stack developer in a team of GECM(Global Energy and Commodity Management) following the scrum methodology. Regarding microservices development, I used Java and Spring Boot as my main tools, while for front-end I used Angular. This hands-on experience allowed me to contribute effectively to projects and hone my skills in front-end and back-end development in a real enterprise environment.

04/2020 - 03/2021

APJO | Kabul (Afghanistan)

Technical Assistan

During my career in the Afghanistan Peace and Justice Organization (APJO), my role focused primarily on providing and maintaining technical support. I played a crucial role in managing the organization's social media presence and website, ensuring that these platforms effectively conveyed the organization's mission and initiatives. In addition, I was responsible for organizing meetings and assisting in the implementation and maintenance of new software solutions within the organization. My contributions not only supported the efficient operation of the team but also facilitated the integration of technology to improve the operational capabilities of the organization.
